Portfolio: riteshpanchal-7.github.io/ritesh.panchal7.github.io · GitHub: github.com/riteshpanchal-7

PROFESSIONAL SUMMARY

Data analyst with strong SQL, Python (pandas, scikit-learn), Power BI and Tableau skills, and 3+ years of banking operations experience handling loan and insurance files for 200+ customers with 100% TAT compliance. Built five end-to-end analytics projects covering churn prediction, fraud detection, forecasting, customer segmentation and A/B testing. Looking for Data Analyst roles (remote or hybrid) where I can turn business questions into clear, measurable recommendations.

TECHNICAL SKILLS

- **Languages:** SQL, Python (pandas, NumPy, scikit-learn, statsmodels, Matplotlib, Seaborn)
- **BI and reporting:** Power BI, Tableau, Advanced Excel (PivotTables, Power Query, XLOOKUP)
- **Analytics:** exploratory data analysis, feature engineering, classification, time-series forecasting, RFM segmentation, hypothesis testing, A/B testing
- **Domain:** banking and BFSI, KYC, loan processing, audit-ready reporting
- **Tools:** Git and GitHub, Jupyter Notebook

DATA PROJECTS

Code and write-ups for every project: github.com/riteshpanchal-7

Customer Churn Prediction & Retention System — Python, pandas, scikit-learn, SQL

- Built a churn classification model (logistic regression and random forest) on customer behaviour and billing data, and ranked the main drivers of churn.
- Grouped at-risk customers by churn probability and proposed a retention action for each group.

Fraud Detection with Imbalanced Data — Python, scikit-learn, imbalanced-learn

- Handled severe class imbalance with SMOTE and class weights, and judged models on precision, recall and PR-AUC instead of accuracy.
- Tuned the decision threshold to balance missed fraud against false alerts.

Sales Forecasting & Time Series Analysis — Python, pandas, statsmodels

- Separated trend, seasonality and noise, and forecast sales with ARIMA-family models.
- Validated forecasts on a hold-out period using MAPE and RMSE.

RFM Customer Segmentation & Marketing ROI Analysis — Python, SQL, Tableau

- Scored customers on recency, frequency and monetary value, and grouped them into segments such as Champions, Loyal and At Risk.
- Compared campaign cost with revenue by segment to estimate marketing ROI and show where spend should go.

End-to-End A/B Testing & Product Funnel Analysis — Python, SQL, SciPy

- Mapped the product funnel to find the steps with the biggest drop-off.
- Planned the A/B test (sample size and significance level) and used hypothesis tests and confidence intervals to recommend whether to ship the variant.

WORK EXPERIENCE

Operations Executive — Jana Small Finance Bank, Omerga, Maharashtra · Sep 2023 – May 2026

- Processed 20–50 home loan and insurance files monthly with 100% TAT compliance and zero regulatory breaches or audit flags in 33+ months.
- Tracked a file pipeline for 200+ customers in Excel and core banking software, cutting average file-to-closure time by about 20%.
- Kept cash and ledger records with zero reconciliation errors and audit-ready reports across quarterly reviews.
- Cross-sold insurance and investment products to existing clients, contributing to a 15%+ rise in per-client revenue.

Inventory Manager — Subhash Medical, Omerga, Maharashtra · Jan 2023 – Aug 2023

- Introduced an inventory control routine that cut overstock and stock-outs by an estimated 30%, with audit-ready procurement records.

Sales Representative — Maitri Pharmaceuticals, Pune, Maharashtra · Apr 2021 – Dec 2022

- Met or exceeded monthly and quarterly sales quotas over 21 months while managing a territory portfolio of doctors and pharmacies.

EDUCATION

B.Sc., Shri Krishna Mahavidyalaya, Gunjoti (Dr. Babasaheb Ambedkar Marathwada University), 2021
